

Electoral Programme

Ahcene Adjeb — FLN Candidate 5 for Constituency 7 Abroad

Legislative Elections – July 2026

A Renewed Commitment to Algerians Abroad

As a candidate representing Constituency 7 Abroad, I am committed to building a stronger, more modern relationship between Algeria and its diaspora. Algerians living abroad are an essential part of Algeria's present and future.

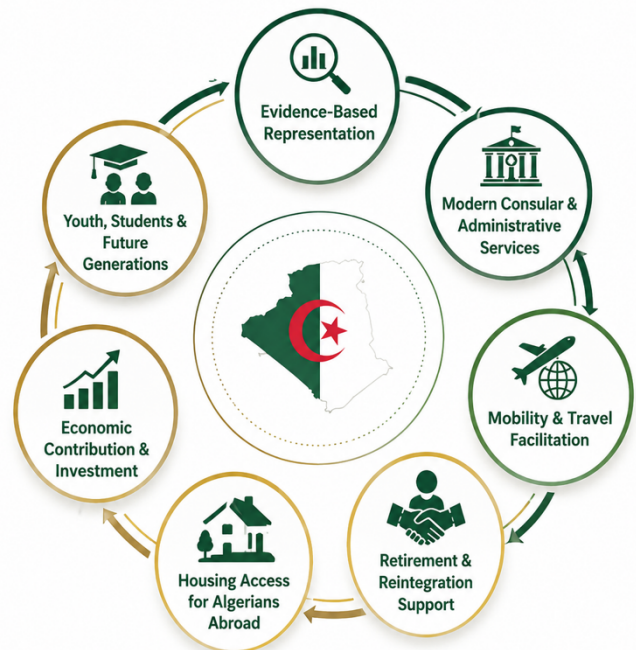

This campaign is built around practical reforms, stronger representation, improved institutional responsiveness, and a renewed partnership between the Algerian state and Algerians across Europe and beyond.

My commitment is simple: to listen, represent, and deliver, guided by evidence-based and results-oriented public policy.

Programme Priorities for Our Diaspora

This programme focuses on the daily realities and long-term aspirations of Algerians abroad through practical proposals on:

- representation and citizen participation in national policymaking,
- modernisation of consular and administrative services,
- mobility and travel facilitation,
- housing and reintegration support,
- investment, innovation, and entrepreneurship,
- youth, students, and academic cooperation,
- cultural engagement and national identity.

Every proposal is guided by one principle: bringing public institutions closer to citizens wherever they live, and ensuring policy is shaped by evidence, expertise, and lived experience.

A Stronger Voice for Algerians Abroad

Representation and Evidence-Based Policymaking

I believe Algerians abroad must have a stronger, more structured role in shaping national priorities and legislation, grounded in evidence-based approaches to public policy.

My commitments include:

- regular consultation with diaspora communities,
- structured surveys, focus groups, and participatory feedback mechanisms,
- local outreach across Constituency 7,
- improved institutional responsiveness to diaspora needs,
- and parliamentary advocacy rooted in real data, lived experience, and practical evidence.

Representation should be responsive, informed, and embedded in real policy outcomes that reflect the needs of Algerians abroad.

Modern Consular and Administrative Services

Improving Institutional Responsiveness

Too many Algerians abroad continue to face unnecessary delays and administrative complexity. Improving institutional responsiveness is therefore a central priority.

I support the modernisation and digitalisation of public services through:

- faster paperwork renewal procedures from any consular service abroad,
- improved access to civil status documents,
- efficient online appointment systems,
- and integrated digital services accessible both abroad and in Algeria.

Administrative services must become simpler, faster, and more responsive to the needs of citizens wherever they reside.

Mobility and Travel Facilitation

Strengthening the Connection with Algeria

Mobility remains essential for maintaining strong family, economic, and cultural ties with our homeland.

I support initiatives aimed at:

- simplifying travel-related procedures,
- reducing unnecessary administrative burdens,
- and exploring more flexible frameworks concerning vehicle stays and mobility regulations for Algerians abroad.

The objective is to strengthen the connection between Algeria and its diaspora through practical and accessible mobility solutions.

Retirement and Reintegration Support

Supporting Those Returning Home

Many Algerians abroad wish to return, retire, or reintegrate into national life after years of working overseas.

I support stronger coordination between:

- pension institutions,
- healthcare systems,
- housing authorities,
- and administrative services,

to ensure smoother reintegration, long-term stability, and dignified support for returning citizens and their families.

Housing Access for Algerians Abroad

Fairer Access to National Opportunities

Algerians abroad remain fully connected to the nation and should benefit from transparent and accessible housing opportunities.

I support:

- simplified procedures,
- clearer eligibility frameworks,
- adapted payment solutions,
- and better institutional coordination for housing access.

National belonging should translate into fair access to opportunity, regardless of geographical distance.

Economic Contribution, Innovation and Investment

Harnessing Diaspora Expertise

Our diaspora represents a major source of professional expertise, entrepreneurship, innovation, and international experience.

I strongly support:

- facilitating investment procedures,
- reducing administrative barriers for entrepreneurs,
- improving institutional coordination,
- supporting research, innovation, and academic cooperation,
- and creating stronger links between diaspora expertise and Algeria's long-term development priorities.

Algerians abroad are strategic partners in Algeria's future development.

Youth, Students and Future Generations

Investing in Human Capital

Young Algerians abroad must remain closely connected to their language, culture, identity, and opportunities linked to Algeria.

I support policies that strengthen:

- support systems for Algerian students abroad,
- educational cooperation between institutions,
- student welfare and guidance mechanisms,
- skills development and training pathways,
- cultural exchange,
- and civic engagement with Algeria.

The future of Algeria depends significantly on investing in its youth abroad and enabling their full participation in national life.

My Commitment

As your candidate, I am committed to representation that is:

- practical,
- accessible,
- transparent,
- modern,
- and firmly grounded in evidence-based policymaking.

This campaign is about restoring trust, improving institutional performance, and strengthening role of Algerians abroad in Algeria's democratic and national development journey.

the

By working together, we can build a more responsive state and a stronger connection between Algeria and all its citizens abroad.
